Room-by-Room Walk-Throughs

Pick a room, start at the door, and work one gentle lap around it.

Room:

Date started: _____ Finished: _____

Every room, first lap

- [ ] Trash to the bin — do this before anything else
  Clearing obvious trash first makes every later decision easier.
- [ ] Dishes, cups, and food out of the room
  They always find their way to odd rooms.
- [ ] Get-from-here-to-home pile: mail, chargers, toys
  Return stray items to the room they belong in.
- [ ] Dust surfaces top to bottom (high shelves → low)
  Gravity is on your side if you start high.
- [ ] Skirting boards, door frames, light switches
  Everyone forgets these; they show up in the light.
- [ ] Floors: sweep/vacuum, then a quick mop if it wants one
- [ ] One “losing spots” check: under things, behind things
  A peek, not a project. Note anything bigger for the Deep-Clean sheet.

Keep this sheet in the room while you work. Anything on one of these lists can be logged as “laundry done” or “head out the door” straight onto the Freecycle & Donate Drop Log. *Medication & medical supplies: you know your processes, but never flush them; ask your pharmacist what they will accept.
